## **DETAILED ACTION**

1. This communication is in response to Applicant's amendment filed on November 26, 2007. The rejections cited are as stated below:

### ***Response to Applicant's amendment***

2. Applicants' amendment filed on November 26, 2007 have been fully considered, and discussed in the next section below or within the following rejections are not deemed to be persuasive. Applicants' request for allowance is respectfully denied.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 8 is rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter.

35 USC 101 requires that in order to be patentable the invention must be a "new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof" (emphasis added). Applicant claim mentioned above is intended to embrace no statutory class of invention as set forth in 35 USC 101. The claim begin by discussing a central repository,

Art Unit: 3691

however, it is unclear as to which statutory class the claim falls under. "A claim of this type is precluded by the express language of 35 USC 101 which is drafted so as to set forth the statutory classes of invention in the alternative only", Ex parte Lyell (17 USPQ2d 1548).

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Eldering US Pat. No. 6,298,348.

Claims 1-9, Eldering discloses a method and a corresponding system for anonymously matching consumption objects with a consumer consumption behavior, said consumer being uniquely identified by a true, objective behavior derived consumption profile (abstract), said system comprising;

a central and private consumer repository containing a plurality of true objective consumption profiles corresponding to a plurality of consumers, each of said true consumption profiles being anonymous (abstract, fig. 5, element 500, and column 9, lines 28-67);

at least one central product repository, containing consumption object profiles for a plurality of consumption objects, each of said at least one central

Art Unit: 3691

product repository, being associated with a given industry, wherein industry participants register profiles of their products and services within said product repository, each said at least one central product repository containing only entry profiles of items registered (abstract, fig. 5, element 500, and column 9, lines 28-67);

correlating means for automatically correlating parameters of a potential target consumption object with parameters of a given consumer's true consumption profile, and identifying at least one best matched consumption object (column 10, lines 1-42); and

means for confidentially presenting said consumer with the profile of said at least one best-matched consumption object so that said industry participant cannot identify said consumer (abstract, column 1, line 37 thru column 2, line 3, and column 11, line 65 thru column 12, line 20).

Eldering discloses a consumer reaction log for logging a consumer's reaction to a correlation between said consumer's true consumption profile and a consumption object, and wherein said consumer's true consumption profiles in the central consumer repository are made available to industry entities for performing market research (column 12, line 20 thru column 13, line 36).
